

Fiber Drum Round

The drum

The cylindrical drum is made from flat-rolled kraft paperboard and is manufactured from natural fibres. It is robust, yet also corrosion-resistant and lightweight. Various protective coatings can be applied to both the inside and outside. These coatings are selected according to the product to be packaged.

The base of the drum

The base is made of laminated kraft paperboard and is edged with metal. The lid is made of laminated kraft paperboard, metal or plastic.
